EDUCATION

B.S.

Computer Science

Harvard University

📅 September 2020 - current

📍 Cambridge, MA

Awards

- Checkmate Master

Relevant courses

- Database Systems
- Networking
- Operating Systems
- Algorithms and Data Structures

SKILLS

Hard skills

- Python (Application Development)
- Visual Studio Code (Profiling & Debugging)
- Mercurial (Version Control)
- Responsive Front-End Design

Soft skills

- User Acceptance Testing Facilitation
- Security-First Development Practices

CAREER OBJECTIVE

Dedicated computer science student with a strong command of Python and proficiency in Visual Studio Code, seeking a role as an entry-level software developer at Amazon. Eager to bring my ability to develop, test, and maintain software to a dynamic team that values innovation.

PROJECTS

FortresMs

Mobile App Developer

📅 November 2022 - current

- Architected FortresMs, an encrypted messaging app built in Python, prioritizing end-to-end security for peer-to-peer conversations.
- Refactored the legacy codebase to a modular architecture, **eliminating 43% of accumulated technical debt** across 12 core modules.
- Incorporated UX feedback from iterative design reviews, shipping 7 interface changes that lifted user engagement by 29%.
- Optimized rendering and background processes in Visual Studio Code profiling tools, reducing in-app lag by 33%.
- Facilitated user acceptance testing sessions with 16 beta testers, translating their input into updates that raised satisfaction scores by 27%.

TravelBuddy

Front-End Developer

📅 January 2021 - January 2022

- Created TravelBuddy, a responsive itinerary-planning app that let users organize trips and sync saved travel data across devices.
- Implemented mobile-first layouts that grew the app's phone user base by 38% and tablet adoption by 21% within six months.
- Condensed redundant front-end assets and lazy-loaded secondary views, **cutting initial page load time by 39%**.
- Designed the drag-and-drop itinerary planner feature from wireframe to deployment, which became the app's most-used daily function.
- Built a cross-device sync engine using WebSocket connections, improving 28-day user retention by 18%.

HOBBIES

- Playing Chess
- Reading non-fiction books
- Developing productivity and messaging apps
