EDUCATION

B.S.

Computer Science

University of Pittsburgh

September 2021 - May 2025

Pittsburgh, PA

GPA: 3.91

Awards

Presidential Scholarship

Cum Laude Society

Dean's List (5/8 semesters)

Relevant courses

Data Structures

Algorithm Design

Database Management Systems

Computer Vision

Software Design Methodology

SKILLS

Java (Android Development), Swift

(iOS Development), SQL, Spotify

API Integration, Peer Code Review

& Mentorship, Community

Program Development

CAREER OBJECTIVE

Industrious recent computer science graduate with a zeal for innovation. Seeking a position at Sikka Software, where the strategic focus on delighting users aligns with my creativity and desire to enhance social events through technology.

PROJECTS

Party Playlist Votes

Creator

- Built a cross-platform mobile voting app that let party hosts crowdsource music selections, cutting playlist decision time by 43 minutes.
- Taught myself Swift independently to port the original Android prototype to iOS within a single semester.
- **Integrated the Spotify API to power a real-time voting queue** where attendees ranked and eliminated tracks live during events.
- Maintained both codebases in Java and Swift, shipping 8 user-requested feature updates across a six-month post-launch cycle.

Student Coder Group

Mentor

September 2022 - May 2025

- **Mentored 13 incoming computer science freshmen** through their first coursework, reviewing code submissions and debugging approaches weekly.
- Organized semester-end networking mixers with fourth-year students that connected underclassmen to 4 Pittsburgh-area development teams.

University of Pittsburgh Soccer

Captain

September 2021 - May 2025

- **Coordinated practice schedules and match logistics** for a 24-player roster, serving as the primary liaison between athletes and coaching staff.
- Launched a youth coaching initiative in Pittsburgh's Hill District, dedicating 12 hours monthly each summer to skills clinics for local teams.
